Profile:

Enthusiastic, Energetic and self-motivated graduate student with strong academic record seeks a career as a user interface (UI) and user experience (UX) designer.

Key qualifications:

- Proactive, approachable, organisational, project management, strong interpersonal skills, outgoing and effective communication skills. Quick learner of new innovative technologies.
 - Well-versed in creating wireframes and prototypes.
 - **Skills:** Proficient in AdobeXD, HTML, CSS and JavaScript.
-

Education:

- **MSc Software Engineering, Maynooth University** **anticipated October 2019**

Related courses: Introduction to User experience, User interface & Interaction design, Interaction design, Internet solutions engineering.

Experience:

- **Yash portfolio – UI designer/ Front-end developer** **September 2019 – Present**

Designed a professional portfolio website that shows my profile and recent work. Recently hosted this website and can be viewed at <https://yash-portifilo.web.app/>

- **Computational thinking games - UI/UX designer** **December 2018 - July 2019**

Designed three simple computational thinking games namely 'Delivery Truck', 'Roller Coaster' and 'Median' that teaches the concept of Hamilton path from graph theory, queues and sorting in a fun and engaging way. Later conducted usability testing to make sure the game design works as intended.

- **Collaborative annotation- UI/UX designer** **March 2019 - April 2019**

Researched on some existing tools on collaborative annotation and interviewed target users to collect requirements. Designed a mockup, conducted a cognitive walkthrough and usability testing. After the analysis of usability test results, the final prototype developed.

- **Bibliography Manager - UI/UX designer** **February 2019 - April 2019**

Collaborated with the team of developer and designed the user interface for this website. Created prototypes and conducted usability testing before front-end development.
